

## **1-Introduction:**

Wuzzuf helps Applicants in their online job search to find Jobs in any Country. The system offers a wide range of services to both employers and those looking for jobs.

For job seekers, Wuzzuf provides a well-used interface where individuals can create custom profiles, upload resumes, and browse different job listings. The system matches candidates with relevant job opportunities based on their skills, experience, and preferences.

The system saves time and cost for companies by reducing the time and resources spent on traditional methods such as posting job postings, reviewing resumes, and scheduling interviews. This leads to significant cost savings in the long run.

It matches job postings with relevant candidates, increasing the likelihood of finding the right person for the job. This saves companies time and effort in identifying suitable candidates from a large pool of applicants.

## **2-User Requirements:**

As an applicant i must be able to login the Application with my e-mail and password ,I should enter some information about myself when creating new account or update exiting account or apply to a new job offer.

i must be able to search for jobs, companies, and locations based on specified criteria , see the jobs similar to the jobs i looking for and see companies profiles .

I should have access to detailed information about job postings to make informed decisions when applying for jobs , apply for a job and send my resume to the party responsible for the job and see my applied applications .

As a company I should enter some information about myself when creating new account or update exiting account, I must enter some details about the job offer to create or update any post.

I must be able to efficiently search for and manage their own job postings within the Wazzaf app, improving the recruitment process and facilitating job vacancy management and i must be able to search for CVs which satisfy a specified feature.
